DS-130DC

Smart Silent Series

Powered By

Humidity Sensor + Time Delay

75% RH

Smart Automated Comfort

Preset humidity sensor with time-delay function automatically regulates ventilation for effective moisture removal, while minimising user intervention.

Energy-Saving DC Motor

Powered by a high-efficiency DC motor consuming as low as 5W, delivering effective ventilation performance with significantly lower energy usage.

Powered By

130 CFM

Strong Airflow Performance

Powerful yet consistent airflow of up to 130 CFM, making it ideal for larger bathrooms and spaces requiring higher ventilation capacity.

Quiet Operation with Flexible Airflow

Multiple airflow speed options allow users to select the optimal ventilation level while maintaining a quiet and comfortable living space.
